

BEIMAR RODRIGO MACHACA ARQUIPA

Full Stack Software Developer

beimar090@gmail.com
+59164151611
La Paz, Bolivia

PROFESSIONAL PROFILE

Final-year student of Commercial Software Engineering, with training as a Higher Technician in Industrial Informatics (degree in progress). Backend-focused profile and scalable system design. Experience developing APIs and backend systems using Java (Spring Boot), C# (.NET), Node.js (TypeScript), and Python with FastAPI. Work with relational and non-relational databases such as MySQL, PostgreSQL, and MongoDB. I have implemented containerization with Docker and process automation through CI/CD pipelines in GitLab. I also have frontend experience with Angular and React, which facilitates full integration between backend and frontend. Passionate about technology, system development, and teaching, with experience in academic mentoring and teamwork under engineering best practices and Clean Architecture.

WORK EXPERIENCE

Jul. 2025 - Sep. 2025
La Paz, Bolivia

Full Stack Developer - Jala University

- Participated in the development of PixPro, an end-to-end image management platform, working on a distributed architecture.
- Designed and implemented backend services using Node.js and TypeScript applying Clean Architecture principles.
- Contributed to the development of a Python microservice for image processing and optimization.
- Implemented containerization with Docker and supported automated deployments using GitLab CI/CD.
- Integrated MySQL, RabbitMQ, and Supabase for persistence, asynchronous messaging, and authentication.
- Collaborated on the frontend development with Angular, implementing modular architecture and lazy loading.

Nov. 2025 - Feb. 2026
La Paz, Bolivia

Full Stack Developer - Freelance

- Developed GymFlow AI, a gym management system (clients, memberships, routines, payments, check-in, and admin dashboard).
- Built the backend with Python + FastAPI applying Onion Architecture, with protected endpoints, JWT authentication, and role-based access control (RBAC).
- Implemented persistence in PostgreSQL using SQLAlchemy 2.0 and data validation with Pydantic.
- Developed QR check-in features and modules such as routines, payments, memberships, and analytics.
- Developed the frontend with React 18 + TypeScript + Vite, using TanStack Router/Query, Zustand, Axios, forms with React Hook Form + Zod, and UI with TailwindCSS.
- Integrated AI (LLM) via OpenRouter to generate personalized routines in JSON format, storing the results and the model used.
- Built an AI assistant for administrators (chat) that analyzes gym data (clients, payments, memberships) and suggests recommendations, with session history.
- Containerized the system with Docker / Docker Compose and configured frontend deployment with Nginx.

Jan. 2024 - Present
La Paz, Bolivia

Software Engineering Mentor - Jala University - Mentor U Program

- Provide academic mentoring in Programming I and II, Databases, and Software Development.
- Support students in developing backend APIs with Java and Spring Boot.
- Perform code reviews and technical guidance on academic projects.
- Contribute to strengthening best practices and fundamentals of backend architecture.

Apr. 2025 - Jun. 2025
La Paz, Bolivia

UI/UX Designer - Jala University

- Participated in the design of TeToca, a mobile service-exchange app, developing the full prototype in Figma.
- Contributed to user research, defining user flows, and creating wireframes and high-fidelity prototypes.
- Designed key experiences such as onboarding, service creation, and profile management.

- Applied Design Thinking principles and good usability and accessibility practices.
- Collaborated with the team through feedback-based iterations to improve the user experience.

EDUCATION

Jan. 2023 - Present Hawa (Remote), United States	Commercial Software Engineering Jala University • Intensive training in Full Stack development and QA Automation, working with multiple technologies aimed at preparing junior developers with professional industry standards. • Recognized as an Outstanding Student for three consecutive semesters. • Currently part of the university mentorship program, providing academic and technical support to students in programming, databases, and software development.
Jan. 2020 - Jun. 2024 La Paz, Bolivia	Higher Technician in Industrial Informatics Escuela Industrial Superior Pedro Domingo Murillo • Technical training focused on industrial informatics, programming, and computer systems applied to technical and industrial environments. • Development of solid foundations in programming logic, databases, and system fundamentals. • Currently in the degree completion process.

COURSES AND CERTIFICATIONS

Dean's List Recognition - Term I 2024 - Term I and II 2025 - Jala University - Present
Programming 1 - Jala University - Mentor U - Jan. 2026
Computer Networks 1 - Jala University - Mentor U - Oct. 2025
Programming 3 - Jala University - Mentor U - Aug. 2025
Software Development I - Jala University - Mentor U - May 2025
Database 2 - Jala University - Mentor U - Apr. 2025
Programming 2 - Jala University - Mentor U - Feb. 2025
Design Patterns with Java Course - Código Facilito - Oct. 2023
Professional Database Course - Código Facilito - Oct. 2023
Professional Java Course - Código Facilito - Oct. 2023
Java Spring Course - Platzi - Nov. 2023
Java Spring Data JPA: Databases - Platzi - Nov. 2023
SQL and MySQL Course - Platzi - Oct. 2023

Scrum Master Course - Platzi - Nov. 2023

Python Essentials 1 - Cisco Networking Academy - Jan. 2023

FREE SECTION 1

I am a person with a strong orientation toward mentoring and teaching, and I enjoy collaborating in teams while maintaining clear and effective communication. I am characterized by my analytical thinking and my ability to solve problems, organizing my work with good time management and a results-oriented focus. I maintain a proactive attitude and continuous learning, adapting quickly to new technologies and challenges. I am especially interested in software architecture, automation, and DevOps practices, working under agile methodologies such as Scrum and Kanban to deliver value consistently.
